INK DUCT FOIL AND CPC CONSUMABLES

The Elite Foil range is manufactured to high tolerances from top-grade PET material ensuring:

- Maximum chemical, thermal and mechanical strength for long life without ink duct contamination.
- Only virgin resin suppliers are used - no recycled polyester.
- Tested using both conventional and UV inks.
- Permanently formed for a secure and accurate fit.
- Compact, low volume packaging for safe, easy and cost effective transportation and storage.

STEEL DOCTOR BLADES

Preground Doctor Blades for Offset, Flexo and Gravure Printing.

Unger Doctor Blades are manufactured on CNC controlled precision machines under permanent observation. Steel blades are normally preferred for high-end flexo printing due to the fine contact area, producing precise metering. Blade widths between 10-80 mm available with or without lamella.

SPECIFICATIONS STEEL BLADES

Specifications STEEL Blades	
Blade Thickness	0.15 - 0.20 mm
Doctor Blade width	10.0 - 80.0 mm
Lamella thickness	from 0.05 mm
Lamella width	0.80 - 1.7 mm
Contact angle (w/ cylinder)	as requested
Length of Blade	coil or fixed length

PLASTIC DOCTOR BLADES

Various plastic and composite materials available including Acetal, UHMW and Polyester.

Both Ultraflex (composite) and Polyester blades are available for Chambered Doctor Blade Systems. For Tresu* Ultraflex is recommended for both the metering and the containment position. For Harris & Bruno systems, it is recommended that Ultraflex is used in the metering position and Polyester in the containment position.

Please
contact us
for further
details.

SPECIFICATIONS STEEL BLADES

BEVELED

Provides the finest contact area for jobs with moderate to difficult requirements.

STRAIGHT

Provides extended blade life for jobs with simple graphic requirements.

LAMELLA

Provides a consistent contact area as the tip wears for custom applications.

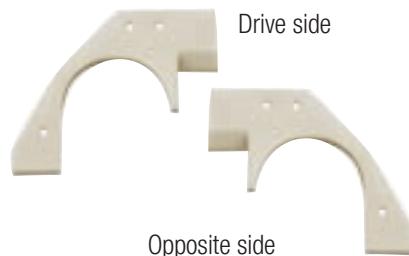

Specifications PLASTIC Blades

Blade thickness	
Ultraflex	0.37 and 0.5 mm
Polyester	0.19, 0.25, 0.37 and 0.5 mm
Blade Width	
Ultraflex	Maximum 63.5 mm
Polyester	Maximum 101.6 mm
Profile Angle	
Ultraflex	22°, 15° or 10°
Polyester	15° Straight

WASH-UP BLADES

Our wash-up blades are manufactured to fine tolerances for perfect fit on old and new presses alike. They are resistant to chemical attack from inks and solvents and are highly efficient and durable.

A perfect profile ensures excellent wash-up results each time, reducing the amount of wash-up chemicals used and reducing down-time on the press.

Our blades are available for the vast majority of offset sheet-fed, web and continuous form presses in either metal/rubber, metal/urethane, rubber (EPDM), plastic or Tufnol format. Each individual blade is presented in a plastic sleeve with the machine reference for easy identification.

HICKEY REMOVERS HEIDELBERG

Hickey removers are designed and manufactured to original specifications. We use the highest quality raw materials including corrosion-proof steel and chemical resistant rubber. The molded rubber tips are chemically bonded to the steel preventing separation.

RECIRCULATION FILTERS

Our long line of replacement and custom designed re-circulation filters are tough, long lasting – and guaranteed to meet or exceed every printer's expectations.

Made in high quality felt, polyester or nylon, Master recirculation filters are carefully fabricated and come with a wide assortment of fittings ensuring ease of installation and compatibility with most press models on the market.

All our filters undergo extensive field testing and provide a high contaminant loading and long service life.

BB-P9101

215 x 165 mm

For Royse systems and many Heidelberg, Komori and Roland presses where a hose can easily be fitted to return-flow

BB-P9102

430 x 275 x 190 mm

For Master Flow systems. Also used on some Royse systems.

BB-P9103

305 x 240 mm

For Technotrans systems (old style)

BB-P9104

255 x 205 mm

For Technotrans systems (new style)

BB-P9105

300 x 235 mm

BB-P9106

225 x 215 mm

Mainly used on Technotrans Alpha D systems fitted to Heidelberg, Komori and Roland presses. Can also be used on Baldwing units which have similar neck fittings.

ELIMINATOR

200 x 115 x 25 mm
Packing: 4 pcs per bag (8 pcs per box)

**Removes emulsified ink!**

The Eliminator is a durable nylon mesh bag filled with ink absorbant material which effectively prevents contamination of the dampening system.

Simply place The Eliminator in the circulation tank and it will float on the surface of the fountain solution removing all emulsified ink.

Addition Pens: Great touch up pens to fill in pin holes, repair
broken solids and add image on all metal plates.

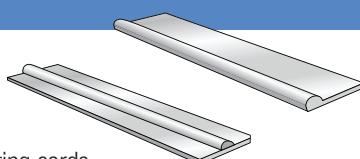

BB-P9348 Addition pen with fine tip

BB-P9349 Addition pen with medium/large tip

SCORE

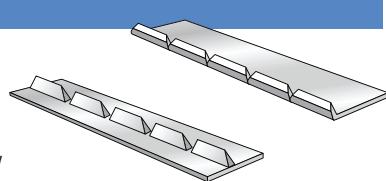

The scoring rule with rounded edge produces a perfect fold on jobs like newsletters, folders, greeting cards and invitations.

The rounded edge prevents surface cracking when scoring through stock with heavy solid ink coverage or coating.

PERF

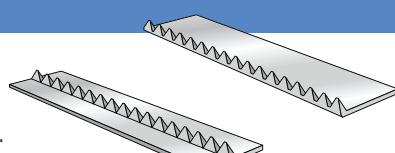

Excellent for reply cards, coupons, and tickets. Precise clean perforation which easily tears apart.

MICRO PERF

The tight 30, 40 & 50 TPI rule is ideal for continuous forms.

When separated the perf line is clean and straight without rough edges.

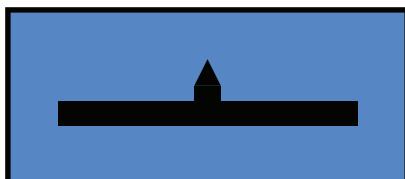

FEATURES

Our perforating strips are manufactured from extremely durable heat treated steel and can be used repeatedly from short to long runs.

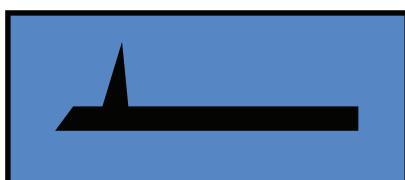

They are supplied with double sided tape so they can be applied directly onto the impression cylinder in either horizontal or vertical positions.

Also, they are designed for high volume sheet fed or web offset printing jobs.

Models	Rules for both Card & Paper	Models
Centre Perf	6 TPI 8 TPI 12TPI 16TPI	Side Perf
Centre Snap	3 TPI 4 TPI	Side Snap
Centre Micro-Perf	30 TPI 40 TPI 50 TPI	Side Micro-Perf
Centre Score		Side Score
Centre Slit		Side Slit

Centre rules are very stable - will not tilt or bend - and therefore excellent for high volume offset or web runs.

Side rules are designed for perfect corner and ends.

SLIT

The sharp durable edge makes a clean, exact cut creating an opening for insertions or slits on cards. Can also be used to create sharp fold on heavier card.

SNAP

Use for quick separation "snap apart" forms like cards, invoices, order forms, receipts etc. Available in 3 or 4 TPI.

All Perf rules are supplied with a double sided adhesive tape on the bottom edge so the rules can be easily mounted both vertically and horizontally on the impression cylinder or on a carrier sheet.

Available in lengths of both 3M/10ft and 6M/20ft. All sizes and models available are listed in our price list and more technical information can be supplied on request.

RED ANTI-MARKING JACKETS

Marking on printed sheets is a common problem for all printers. The main cause is that during printing, ink builds up on the cylinders and later smears off on printed sheets. The result is down time, wasted paper, interrupted work flow and increased cost.

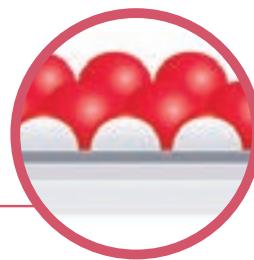

Over the years many products have been developed in an effort to eliminate this marking problem. Some are extremely expensive and some are less effective.

The Red Anti-marking Jacket was developed to offer the printer a highly effective yet very affordable and durable solution. The Red Anti-marking Jacket replaces all existing systems and is installed quickly and easily on transfer cylinders.

The Red Anti-marking Jacket are available with different fittings depending on the model and age of your Heidelberg press. These include clip-on for SM74 presses and loop fixing for SM102 presses. Loop fittings are made of solvent resistant durable elastic material with controlled stretch for quick and easy installation.

The Red Anti-Marking Jackets are offered with the traditional "fine" (smaller) glass beads but the "coarse" (larger) glass bead version is also increasingly popular especially with packaging printers. Let the printer decide!

SUCTION DISCS

Ever increasing running speeds of todays sheet fed printing machines and collators demand the highest performance from the feeder system.

Birk & Blyme stocks a full range of flat rubber suckers for all types of machines. The range have been developed to offer a durable and consistent performance when used in sheet feeders. All flat suckers are colour coded which indicates thickness. Please refer to the table.

PAPER CUTTING KNIVES

Compare our quality and prices for value! We supply a range of high quality paper cutting knives imported from Germany's two leading knife manufacturers, **Schönenberger** and **Fassco**. Knives are available to suit both guillotines and three knife trimmers for all makes and models including: *Müller Martini, Polar, Sheridan, Wohlenberg, Harris Macey, Kolbus, McCain, Schneider, Heidelberg/Stahl, Osako and more!

STEEL QUALITIES

We offer the following selection of knife grades, so you can choose the right knife for your requirements.

STANDARD INLAID TOOL STEEL - F-220 (52/100)

The quality of the hardened cutting steel is well proven and suitable for universal use.

HIGH CARBON/HIGH CHROME - F-236 (12% Chromium, D2)

Widely used for lower knives in three knife trimmers. Out performs standard steel 2:1

HIGH SPEED STEEL HSS (18% Tungsten, M2)

Designed to be more abrasion resistant. This knife will reduce down-time with approx 3-5 times longer life than Tool Steel F-220.

TCT Tungsten Carbide Tipped

Well known quality with high wear resistance. Out performs F-3000 up to 3 times.

LONGLIFE Super Fine Grain Tungsten

For applications where knife changes must be avoided as long as possible. Approx 2 times longer life than standard TCT knives.

MEGALIFE Super-Micro Fine Grain Tungsten

Improved cutting quality with less dust. Reduced tendency of cutting edge breaking. Approximately 6 times longer life than standard TCT knives.

SAVE ON
OEM
QUALITY
KNIVES

All Guillotine knives longer than 700 mm are supplied in a solid timber box for extra protection and safety

KNIFE GUARDS

For 3 Knife Trimmers & Guillotines

- Great protection while transporting knives
- Adds protection while servicing machine
- Magnetic strip holds guard firmly in place
- All plastic construction from yellow uPVC

CUTTING STICKS

Our premium quality imported cutting sticks will extend knife life and reduce machine downtime.

Do NOT compromise your knives with poor quality cutting sticks.

AVAILABILITY

Cuttings sticks are available for most Guillotines and Trimmers including: *Polar, Wohlenberg, Itoh, Ideal, Horizon, Schneider, Sheridan, Müller Martini, Kolbus, Perfecta and many more.

BOOK HOLD DOWN/GUIDES

Book Guides is an essential tool to assure an even cut when trimming books on a guillotine.

Attaches to the back gauge and compress the spine of the books to assure a quality cut.

47 C-SHAPE

CH5-7-M361

ANGLE GUIDES

Angle Guides for printers that need to cut corners, this is the right little tool.

- Cuts on any angle from 0-170°
- Slides and locks onto back gauge

BBS39

JOGGER BLOCKS

Jogger Blocks are made from tough, durable HDPE plastic and come with a Tufnell wear strip ensuring bottom sheet accuracy is maintained throughout the jogger blocks long working life.

Each jogger block is equipped with a magnetic strip in the base to help jog bottom sheets perfectly.

All medium and large jogger blocks are supplied with the "pistol grip" handle for comfortable long term use.

Part #	Description

JB150x600	Plastic 150 x 600 mm
JB150x650	Plastic 150 x 650 mm

MAG PADS

For just a few dollars you can put the Mag Pad to work protecting your delicate paper stocks from cutter clamp marks and damage. The durable magnetic rubber surface on one side holds the pad securely in position on the clamp while cutting. The high density foam pad prevents sharp edges of the clamp fingers from marking stock.

Pack includes two (2) 3" x 15" pads.

Part # MAGPAD

PAPER DRILLS

Paper Drills, Baseboards and sharpening tools to suit Lihit, Sterling, Uchida, Iram, Citoborma, Hang etc.

TEFLON COATED

Teflon Coated drills are available in many sizes. Provide lubricity to the inside and outside of your drills. Slugs flow smoothly without binding. Friction is reduced to increase the wear life of the cutting edge. This is a very good coating for keeping slugs from building up and breaking the drills. Works better on varnished or laminated stock.

ROTARY UNION

The quality of ROTOFUX is "consistent quality" warranted by the stringent testing of every single union before dispatch. Only high quality materials (stainless steel, special steels, brass, carbide) are used in making ROTOFUX union. The careful control of the manufacturing process involved in producing the necessary parts guarantees that all the unions are manufactured within the technical specification.

- Top Quality European Made
- For all presses including Heidelberg*, Komori* and MAN-ROLAN*
- **Call us for your Rotary Union requirements!**
